Weekly Lesson Plan – Week 3 · Semester 1 · 2026–27 · Da Vinci School

Teacher: Gavaldon | Week of: Aug 24, 2026 | Course: Manufacturing Engineering Technology I

TEKS / ELPS:

TEKS: §127.15(d)(1) employability skills - present and defend technical work; §127.15(d)(1) employability skills - evaluate work and give professional feedback; §127.813(d)(1) software skills applied to manufacturing - set up and navigate a software environment; §127.813(d)(2) writing programmable logic - sequence, condition, and control concepts; §127.813(d)(2)(A) use programmed instructions to make a process run in the correct order
ELPS: c.1A, c.2E, c.3D, c.3E, c.4G, c.5B

Aim of the Lesson / Objective: *Statement of what you want students to do (skill) and/or know (knowledge). Students will…*

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
Students will present their product to a review panel and defend it under questioning, and evaluate peer designs against a shared rubric.	Students will finish presenting and defending their designs, then identify what the strongest design solutions had in common.	Students will create a freeCodeCamp account with their school credentials and explain how the course is organized.	Students will define a variable, distinguish between data types, and explain when to use let versus const.	Students will follow a guided build to produce a working program and debug it using the error messages.

Employed Language Domain(s) Objective: *How students achieve the objective – Listening, Speaking, Reading, Writing. Students will…*

Students will collaborate in teams to investigate engineering problems, communicate their findings, and present their solutions. They will listen to team members' ideas, discuss potential solutions, read relevant technical materials, and write explanations of their designs and findings.

Assessment of Content Objective: *Instrument used to determine mastery. Ex: Exit Ticket.*

Students will be assessed by written, group, or oral responses throughout the class period.

Set (Bell Work): *A motivating action that engages students in the objective – question, fact, activity. Essential Question:*

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
What is the one question you are most afraid the panel will ask you?	Which product you saw yesterday solved the most real problem, and why?	Name one thing you use every day that only works because somebody wrote code for it.	What do you think a "variable" is in a program?	What is the difference between let and const?

Methodology / Steps: *What it takes to teach the objective so 100% can pass the assessment. Teacher will… Teams will… Individuals will…*

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
Step 1: Bell ringer / essential question. Step 2: Bell-work: the question you're most afraid of (5 min) Step 3: Order of business + judging rules (5 min) Step 4: Design Reviews: 3-min pitch + 2-min defense per firm (30 min) Step 5: Turn in peer scorecards (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell-work: which product solved the most real problem? (5 min) Step 3: Remaining firms present + defend (28 min) Step 4: Class debrief: what every strong pitch had (7 min) Step 5: Best Engineering Judgment + exit (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell-work: something that only works because of code (5 min) Step 3: Where this fits: two weeks code, two weeks Fusion (6 min) Step 4: Account setup, step by step (rolling by row) (16 min) Step 5: Course tour: the five kinds of work + start item 1 (13 min) Step 6: Post the sign-in screenshot (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell-work: what is a variable? (5 min) Step 3: Where we are going: finish Module 1 (5 min) Step 4: Theory x3: Intro to JavaScript, Intro to Strings, Code Clarity (30 min) Step 5: Exit ticket: write a line that stores your name (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell-work: let versus const (5 min) Step 3: How a Workshop works + the stuck-protocol (5 min) Step 4: Build a Greeting Bot (30 min) Step 5: Exit ticket: paste the line that prints the message (5 min)

Resources: *Textbook, handouts, visuals, laptops.*

Google Classroom, projector, engineering notebook, Design Brief packet / worksheets, laptops or phones for AI tools.

Re-Teaching Activities: *What you prepare if students do not master the objective.*

Review during bellwork; small-group re-teach; peer support.

Reflection: *Students analyze what they accomplished and how they reached mastery.*

Exit ticket – students state what they accomplished and what worked best.

Study Skills: *Skills implemented by students – note-taking, summarizing, teamwork, etc.*

Note-taking, summarizing, outlining, reading comprehension, teamwork, oral communication, problem-solving.

SPED & 504 Accommodations / Modifications: *Codes.*

Per Individualized Education Plan (IEP) / 504 plan.

ELL Accommodations: *Codes.*

Clarify directions (CD); Extra time (ET); Peer and Native Language Support (PN); Pre-teach vocabulary (PV); Rephrase, Repeat, Slow Down (RS); Visual Cues (VC); Wait time (WT); Pictorial Representation (DP).
