Weekly Lesson Plan – Week 4 · Semester 1 · 2026–27 · Da Vinci School

Teacher: Gavaldon | Week of: Aug 31, 2026 | Course: Principles of Applied Engineering

TEKS / ELPS:

```
TEKS: §127.391(d)(10)(A)-(F) identify and define a problem; create and test alternative solutions; §127.391(d)(1)(B) inputs, processes, and outputs; (d)(2)(A) communicate findings clearly; §127.391(d)(1)(B) inputs, processes, and outputs of technological systems; §127.391(d)(5)(C) use problem-solving techniques to develop technological solutions such as a product, process, or system
ELPS: c.1C, c.2C, c.4C, c.4F, c.5B, c.5G
```

Aim of the Lesson / Objective: *Statement of what you want students to do (skill) and/or know (knowledge). Students will…*

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
Students will build a working program from a goal statement without step-by-step instructions.	Students will build a second program independently and identify its input, process, and output.	Students will summarize the variables and data types they have learned and prepare for the module quiz.	Students will demonstrate mastery of variables and data types on a graded quiz and begin working with strings.	Students will combine variables and strings in a guided build and summarize what they learned across the module.

Employed Language Domain(s) Objective: *How students achieve the objective – Listening, Speaking, Reading, Writing. Students will…*

Students will collaborate in teams to investigate engineering problems, communicate their findings, and present their solutions. They will listen to team members' ideas, discuss potential solutions, read relevant technical materials, and write explanations of their designs and findings.

Assessment of Content Objective: *Instrument used to determine mastery. Ex: Exit Ticket.*

Students will be assessed by written, group, or oral responses throughout the class period.

Set (Bell Work): *A motivating action that engages students in the objective – question, fact, activity. Essential Question:*

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
In a Lab, freeCodeCamp does not give you the steps. What is the first thing you do when you get stuck?	Yesterday, what was the one thing that finally made your code work?	Name three kinds of values a variable can hold, and give an example of each.	Read this code and say exactly what it prints.	What is a string, and how do you join two of them together?

Methodology / Steps: *What it takes to teach the objective so 100% can pass the assessment. Teacher will… Teams will… Individuals will…*

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
Step 1: Bell ringer / essential question. Step 2: Bell-work: what you do first when you are stuck (6 min) Step 3: How a Lab is different from a Workshop (5 min) Step 4: Build a JavaScript Trivia Bot (Lab) (29 min) Step 5: Exit ticket: hardest part + what you tried (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell-work: what finally made your code work yesterday (5 min) Step 3: Plan it before you type it (5 min) Step 4: Build a Sentence Maker (Lab) (30 min) Step 5: Exit ticket: name the input, process, and output (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell-work: three kinds of values with examples (6 min) Step 3: Working with Data Types (Theory) (16 min) Step 4: JavaScript Variables and Data Types Review + take study notes (18 min) Step 5: Exit ticket: what you are still shaky on (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell-work: read the code and say what it prints (5 min) Step 3: JavaScript Variables and Data Types Quiz (graded) (15 min) Step 4: Working with Strings in JavaScript (Theory) (20 min) Step 5: Exit ticket: post your score + one miss (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell-work: what a string is and how to join two (5 min) Step 3: Build a Teacher Chatbot (Workshop) (28 min) Step 4: Module 1 checkpoint: what you can now do (7 min) Step 5: Exit ticket + Fusion starts Monday (5 min)

Resources: *Textbook, handouts, visuals, laptops.*

Google Classroom, projector, engineering notebook, Design Brief packet / worksheets, laptops or phones for AI tools.

Re-Teaching Activities: *What you prepare if students do not master the objective.*

Review during bellwork; small-group re-teach; peer support.

Reflection: *Students analyze what they accomplished and how they reached mastery.*

Exit ticket – students state what they accomplished and what worked best.

Study Skills: *Skills implemented by students – note-taking, summarizing, teamwork, etc.*

Note-taking, summarizing, outlining, reading comprehension, teamwork, oral communication, problem-solving.

SPED & 504 Accommodations / Modifications: *Codes.*

Per Individualized Education Plan (IEP) / 504 plan.

ELL Accommodations: *Codes.*

Clarify directions (CD); Extra time (ET); Peer and Native Language Support (PN); Pre-teach vocabulary (PV); Rephrase, Repeat, Slow Down (RS); Visual Cues (VC); Wait time (WT); Pictorial Representation (DP).
