

Weekly Lesson Plan – Week 6 • Semester 1 • 2026–27 • Da Vinci School

Teacher: Gavaldon Week of: September 14, 2026 Course: Principles of Applied Engineering				
TEKS / ELPS:				
TEKS: §127.391(d)(2)(C) set up and navigate CAD (CADD); 127.15(d)(1) professional online conduct; §127.391(d)(2)(C) computer-aided design and drafting (CADD) ELPS: c.1C, c.2C, c.3E, c.4C, c.4F, c.5G				
Aim of the Lesson / Objective: <i>Statement of what you want students to do (skill) and/or know (knowledge). Students will...</i>				
MONDAY SEP 14	TUESDAY SEP 15	WEDNESDAY SEP 16	THURSDAY SEP 17	FRIDAY SEP 18
Students will create their Autodesk education account with their school email, sign in to Fusion 360, join the class hub, and locate their private work folder.	Students will sketch a dimensioned rectangle, extrude it into a solid, and use a rectangular pattern to create a toy block with eight studs.	Students will apply shell, extrude, and fillet features to complete the toy block model and save it to their work folder.	Students will insert and calibrate a reference image, sketch a profile with lines and a spline, revolve it into a 3D bottle, and finish it with shell, fillet, and a glass appearance.	Students will complete any unfinished setup or models from this week and verify that both models are saved in their work folder.
Employed Language Domain(s) Objective: <i>How students achieve the objective – Listening, Speaking, Reading, Writing. Students will...</i>				
Students will collaborate in teams to investigate engineering problems, communicate their findings, and present their solutions. They will listen to team members' ideas, discuss potential solutions, read relevant technical materials, and write explanations of their designs and findings.				
Assessment of Content Objective: <i>Instrument used to determine mastery. Ex: Exit Ticket.</i>				
Students will be assessed by written, group, or oral responses throughout the class period.				
Set (Bell Work): <i>A motivating action that engages students in the objective – question, fact, activity. Essential Question:</i>				
MONDAY SEP 14	TUESDAY SEP 15	WEDNESDAY SEP 16	THURSDAY SEP 17	FRIDAY SEP 18
What are today's key ideas in: Fusion 360 Accounts + Join the Class Hub?	A LEGO brick from 1958 still snaps onto one made today. What has to be true about the measurements for that to work?	Most plastic parts are hollow on the inside, not solid. Why would a company make a part hollow?	Name something in your house that is round and could be made by spinning one flat outline around a center line. Describe the outline.	What went wrong for you in Fusion this week, and how did you fix it? If nothing went wrong, what almost did?
Methodology / Steps: <i>What it takes to teach the objective so 100% can pass the assessment. Teacher will... Teams will... Individuals will...</i>				
MONDAY SEP 14	TUESDAY SEP 15	WEDNESDAY SEP 16	THURSDAY SEP 17	FRIDAY SEP 18
Step 1: Bell ringer / essential question. Step 2: How today works: five steps, in order (5 min) Step 3: Steps 1-2: school Outlook, then create the Autodesk account (10 min) Step 4: Step 3: open Fusion (desktop or browser) and sign in (10 min) Step 5: Steps 4-5: Join Hub, switch hubs, find your folder (12 min) Step 6: Check-out: teacher sees your folder; finishers talk a neighbor through it (8 min)	Step 1: Bell ringer / essential question. Step 2: Bell work: why do LEGO measurements have to be exact? (10 min) Step 3: How we watch: pause, build, play (5 min) Step 4: Day 1 video: sketch, extrude, stud, rectangular pattern (25 min) Step 5: Save to your folder: Day 1 - Toy Block - Lastname (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell work: why are most plastic parts hollow? (10 min) Step 3: Finish Day 1: shell through the bottom, inside columns, fillet (27 min) Step 4: Save over yesterday's file (3 min) Step 5: Finished? Start Day 2 early (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell work: what in your house is made by spinning a shape? (10 min) Step 3: Get the bottle picture; Insert > Canvas (5 min) Step 4: Day 2 video: calibrate, spline, revolve, then shell, fillet, glass (28 min) Step 5: Save to your folder: Day 2 - Soda Bottle - Lastname (2 min)	Step 1: Bell ringer / essential question. Step 2: Bell work: what went wrong in Fusion this week and how did you fix it? (10 min) Step 3: Make-up (substitute): finish what is not done - setup, Day 1, Day 2; ahead = start Day 3 (30 min) Step 4: Check your folder: both files, right names (5 min)
Resources: <i>Textbook, handouts, visuals, laptops.</i>				
Google Classroom, projector, engineering notebook, Design Brief packet / worksheets, laptops or phones for AI tools.				
Re-Teaching Activities: <i>What you prepare if students do not master the objective.</i>				
Review during bellwork; small-group re-teach at the teacher table; one-on-one explanation on request; peer and native-language support within the seating group.				
Reflection: <i>Students analyze what they accomplished and how they reached mastery.</i>				
Exit ticket – students state what they accomplished and what worked best.				
Study Skills: <i>Skills implemented by students – note-taking, summarizing, teamwork, etc.</i>				
Note-taking, summarizing, outlining, reading comprehension, teamwork, oral communication, problem-solving.				
SPED & 504 Accommodations / Modifications: <i>Codes.</i>				
Per Individualized Education Plan (IEP) / 504 plan.				
ELL Accommodations: <i>Codes.</i>				
Clarify directions (CD); Extra time (ET); Peer and Native Language Support (PN); Pre-teach vocabulary (PV); Rephrase, Repeat, Slow Down (RS); Visual Cues (VC); Wait time (WT); Pictorial Representation (DP). GROUPING: students are seated in mixed-proficiency small groups so emergent bilingual students hear and use the academic vocabulary in context, rehearse with a peer before whole-class response, and can be pulled as a small group for re-teach (PN, WT). ONE-ON-ONE: individual teacher explanation is available on request every period; directions are restated and modeled individually at the student desk after whole-class delivery (CD, RS, VC).
