

CTE Week — Student Packet

This packet is five days of work. One part per day. Everything you need is in here — read the part, do the writing, keep the packet. You turn the whole thing in at the end of the week.

How this works

- **One part per day.** Do not skip ahead unless you finish early.
- **Complete sentences.** One-word answers are not finished work.
- **Keep the packet** in your notebook all week. Lost packet = start over.
- If you finish a part early, go back and add detail to an earlier answer.

1 What is in the packet

DAY	WHAT YOU DO	TURN IN
Part 1	Ethics on the job — read a real case and find the decision point	5 questions
Part 2	You make the call — pick an option and defend it	Decision + 3 reasons + cost
Part 3	Watch and analyze a product improving version to version	4 questions
Part 4	What employers actually want — honest self-audit	Ratings + a real plan
Part 5	Research a real career with real numbers	5 facts + your source

Part 3 video

The link is posted in Google Classroom. Start it at **1:28**.

Grading

Each part is worth 20 points — 100 for the packet. You are graded on whether you actually answered the question and gave a reason, not on having the "right" opinion.

Ethics on the Job

Name _____ Period _____ Date _____

The case — read this first

A crew is installing a run of shelving in a school hallway. The anchors that were ordered are rated for 40 pounds each. They did not arrive, so the site lead substitutes anchors he already has in the truck — rated for 15 pounds. He tells the crew, "It is just books, and we are behind. We will swap them out later." The shelves go up Friday. Nobody writes it down. Six weeks later a loaded shelf pulls out of the wall during passing period. No one is seriously hurt.

1 Answer all five — complete sentences

QUESTION	YOUR ANSWER
1. What happened? the failure, in one sentence	
2. Who knew? who saw it coming	
3. What was the pressure? money, deadline, boss, reputation	
4. The decision point the exact moment it could have been stopped	
5. What should they have done? your judgment + a reason	

Last question

Who did the site lead put first — the public, the client, the company, or himself? Explain.

You Make the Call

Name _____ Period _____ Date _____

The situation

One week before your product ships, your team finds a flaw. Fixing it means missing the launch date. Your manager wants it shipped on time.

1 Name the flaw you are dealing with

Use your own project, or invent a realistic one (a part that cracks, a battery that overheats, a strap that tears).

2 Circle your call

A — SHIP IT	B — DELAY IT	C — SHIP AND WARN
Say nothing. Hit the date.	Miss the launch. Fix the flaw.	Launch, disclose the flaw, fix later.

3 Three reasons — tied to the flaw, not to your feelings

1.	
2.	
3.	

4 What your choice costs you

Every option costs something. Name it.

5 Word for word, what you tell the customer

Watch and Analyze

Name _____ Period _____ Date _____

Watch first — start at 1:28https://www.youtube.com/watch?v=H8Gr1B_lQuM&t=88s

The link is in Google Classroom. Watch the whole progression. You may rewatch as many times as you need.

1 Two improvements from one version to the next

WHAT CHANGED	WHAT PROBLEM DID IT FIX?

2 Which change mattered most, and why?

3 If it were your product, what would you change next?

Not an answer"It looked better." Say **what** changed and **what problem** that change solved.

What Employers Actually Want

Name _____ Period _____ Date _____

Rate yourself honestly. 1 = I struggle with this. 5 = I do this without being told. Nobody is a 5 in everything — all 5s means you did not do the assignment.

EMPLOYABILITY SKILL	1	2	3	4	5
Show up on time, every day	1	2	3	4	5
Do what I said I would do	1	2	3	4	5
Ask when I do not know	1	2	3	4	5
Take correction without arguing	1	2	3	4	5
Work with people I did not choose	1	2	3	4	5
Clean up after myself	1	2	3	4	5
Stay off my phone during work	1	2	3	4	5
Finish what I start	1	2	3	4	5

1 Your lowest score — and what you will do about it

Name the skill, then one specific thing you will change this six weeks. "Try harder" is not a plan.

2 Your two strongest hard skills

A hard skill is something teachable and testable — CAD, measuring, coding, welding, wiring. For each, how would you **prove** it to an employer?

HARD SKILL	HOW I WOULD PROVE IT
_____	_____
_____	_____

A Real Career, Real Numbers

Name _____ Period _____ Date _____

Where to look

Use the **Bureau of Labor Statistics Occupational Outlook Handbook** ([bls.gov/ooh](https://www.bls.gov/ooh)) or **Texas Career Check** ([texascareercheck.com](https://www.texascareercheck.com)). Write down which one you used.

1 The career I researched

2 Find these five facts

FACT	WHAT YOU FOUND
Median pay a real number per year	_____
Education needed certificate, 2-yr, 4-yr, apprenticeship	_____
Three things they do all day	_____ _____ _____
Growing or shrinking?	_____ _____
One certification or license	_____ _____

3 My source

Last question

Would you actually want this job? Yes or no — and **why**, using something you found above. "It pays good" is not enough. Name the number.
