

Weekly Lesson Plan – Week 4 • Semester 1 • 2026–27 • Da Vinci School

Teacher: Gavaldon Week of: Aug 31, 2026 Course: Principles of Applied Engineering				
TEKS / ELPS:				
TEKS: §127.391(d)(2)(A) use clear and concise written, verbal, and visual communication techniques; §127.391(d)(1)(B) identify the inputs, processes, and outputs associated with technological systems; §127.391(d)(5)(C) use problem-solving techniques to develop technological solutions; §127.391(d)(10)(A)-(F) identify and define a problem; create, test, and evaluate solutions; §127.391(d)(1)(B) inputs, processes, and outputs; (d)(2)(A) communicate findings clearly ELPS: c.1C, c.2C, c.3E, c.4C, c.4F, c.5G				
Aim of the Lesson / Objective: <i>Statement of what you want students to do (skill) and/or know (knowledge). Students will...</i>				
MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
Students will explain why readable code matters and apply naming conventions that make code understandable.	Students will complete the code clarity item and revise their own earlier code to be readable by someone else.	Students will follow a guided build to produce a working program and identify its input, process, and output.	Students will debug a program by reading its error messages and get it running.	Students will complete course items 3 and 4 and explain how their own program works line by line.
Employed Language Domain(s) Objective: <i>How students achieve the objective – Listening, Speaking, Reading, Writing. Students will...</i>				
Students will collaborate in teams to investigate engineering problems, communicate their findings, and present their solutions. They will listen to team members' ideas, discuss potential solutions, read relevant technical materials, and write explanations of their designs and findings.				
Assessment of Content Objective: <i>Instrument used to determine mastery. Ex: Exit Ticket.</i>				
Students will be assessed by written, group, or oral responses throughout the class period.				
Set (Bell Work): <i>A motivating action that engages students in the objective – question, fact, activity. Essential Question:</i>				
MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
Where is the line between using AI and cheating on your own work?	If AI can already do the entry-level version of a job, should companies still hire people to learn it?	An AI system makes a mistake and a real person gets hurt. Who is responsible - the person who used it, the company that built it, or nobody?	Should an AI have to tell you it is an AI when it talks to you?	Name one decision AI should never be allowed to make on its own. Defend it.
Methodology / Steps: <i>What it takes to teach the objective so 100% can pass the assessment. Teacher will... Teams will... Individuals will...</i>				
MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
Step 1: Bell ringer / essential question. Step 2: Bell work: where is the line between using AI and cheating? (10 min) Step 3: Code is read more than it is written (8 min) Step 4: Work item 3: Understanding Code Clarity (22 min) Step 5: Post the daily freeCodeCamp screenshot (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell work: should companies still hire people for jobs AI can do? (10 min) Step 3: The stuck protocol (5 min) Step 4: Finish item 3 (20 min) Step 5: Rename drill: fix three lazy names in your own code (5 min) Step 6: Post the daily freeCodeCamp screenshot (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell work: an AI hurts someone - who is responsible? (10 min) Step 3: How a Workshop differs from Theory + Input/Process/Output (7 min) Step 4: Work item 4: Build a Greeting Bot (23 min) Step 5: Post the daily freeCodeCamp screenshot (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell work: should an AI have to tell you it is an AI? (10 min) Step 3: Reading errors: line numbers, unexpected token, not defined (8 min) Step 4: Finish the build and get it running (17 min) Step 5: Bug log in the notebook (5 min) Step 6: Post the daily freeCodeCamp screenshot (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell work: one decision AI should never make on its own (10 min) Step 3: Catch up: finish items 3 and 4 (18 min) Step 4: Explain your bot: point at input, point at output (7 min) Step 5: Account check - I verify every progress page (5 min) Step 6: Post the daily freeCodeCamp screenshot (5 min)
Resources: <i>Textbook, handouts, visuals, laptops.</i>				
Google Classroom, projector, engineering notebook, Design Brief packet / worksheets, laptops or phones for AI tools.				
Re-Teaching Activities: <i>What you prepare if students do not master the objective.</i>				
Review during bellwork; small-group re-teach; peer support.				
Reflection: <i>Students analyze what they accomplished and how they reached mastery.</i>				
Exit ticket – students state what they accomplished and what worked best.				
Study Skills: <i>Skills implemented by students – note-taking, summarizing, teamwork, etc.</i>				
Note-taking, summarizing, outlining, reading comprehension, teamwork, oral communication, problem-solving.				
SPED & 504 Accommodations / Modifications: <i>Codes.</i>				
Per Individualized Education Plan (IEP) / 504 plan.				
ELL Accommodations: <i>Codes.</i>				
Clarify directions (CD); Extra time (ET); Peer and Native Language Support (PN); Pre-teach vocabulary (PV); Rephrase, Repeat, Slow Down (RS); Visual Cues (VC); Wait time (WT); Pictorial Representation (DP).
