CAD crossword — the tools we have used

No computers today (SAT testing). Everything here comes from Days 1–7 in Fusion. Use your notebook if you need it.

Name: _____ Period: _____

Across

2. The number that fixes a size in a sketch (9)

4. Makes a part look like glass or metal - it does not change strength or weight (10)

5. Cuts a flat angle across an edge instead of rounding it (7)

7. Raises or recesses text onto a face (6)

13. The spiral groove that lets a nut grip a bolt (6)

14. Repeats a feature in a row or a grid (7)

16. A model that remembers how it was built, so you can change a number and it rebuilds (10)

19. Hollows a solid out and leaves walls (5)

21. Blends several profiles at different heights into one shape (4)

23. A flat surface you sketch on; make a new one by offsetting (5)

24. Spins a profile around a center line - how the soda bottle was made (7)

25. Pulls edges from existing geometry into your sketch (7)

Down

1. Every model starts as this, in two dimensions (6)

3. Copies a feature to the other side of a plane (6)

6. Rounds a sharp edge (6)

8. Drags a profile along a path - how the paperclip was made (5)

9. Keeps only the volume where two bodies overlap (9)

10. A photo brought into Fusion and calibrated so you can trace it (6)

11. The shape you center on the origin to start the block method (9)

12. The curve tool that bends through the points you click (6)

13. The build history across the bottom of the screen (8)

15. The point where the three axes meet - where every model starts (6)

17. A rule that locks sketch geometry in place, like horizontal or tangent (10)

18. A part that can have its own bodies, sketches and origin inside an assembly (9)

20. Pushes a flat sketch straight out into a solid (7)

22. The slight angle that lets a part come out of a mold (5)

The word bank is on the back — every answer is there. Use it.

ENGINEERING · SIDE 2 · WEDNESDAY, OCTOBER 14

Word bank & what they mean

Every word below is an answer in the crossword on the front.

APPEARANCE	EXTRUDE	PATTERN	SPLINE
CANVAS	FILLET	PLANE	SWEEP
CHAMFER	INTERSECT	PROJECT	TAPER
COMPONENT	LOFT	RECTANGLE	THREAD
CONSTRAINT	MIRROR	REVOLVE	TIMELINE
DIMENSION	ORIGIN	SHELL	
EMBOSS	PARAMETRIC	SKETCH	

Now pick TEN of them

Write one sentence for each, **in your own words** — what the tool does, or when you would use it. Not the dictionary, not the clue. If you are not sure, picture the build it came from: the block, the bottle, the paperclip, the tray, the nut.

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Done early? On the bottom, name the three tools you would need to model a water bottle with your name raised on the side, and say what each one does.
