240 students × 3 half-sheets**~370 sheets**

HOW TO PRINT — 3 HALF-SHEETS PER STUDENT

1. Each syllabus PDF is **3 landscape pages** (policies · roadmap · pathway), **2 copies per page, single-sided**.
2. Set **Copies** = number shown (80 / 20 / 20) — that's half the students, since it prints 2-up.
3. Print, then **cut every sheet down the middle** → each kid gets their 3 half-sheets to glue in.
4. Restroom log: **full page, 1-sided**, 10 copies.

WHICH CLASS GETS WHAT

- **Manufacturing** (5 sections): 80 copies → 160 kids.
- **InSPIRESS / Design & Problem Solving** (senior): 20 → 40 kids.
- **Principles of Applied Eng.** (6th pd): 20 → 40 kids.
- **Restroom logs**: 10 — clipboard by the door.

~370

ESTIMATED TOTAL PAPER

~370 landscape sheets (240 students × 3 half-sheets, printed 2-up = 360, + 10 restroom). Cut each in half after printing.
