

Fusion 360 setup — five steps, in order

By the bell: you're signed in, you're in the class hub, and your own folder is open. **Join the hub BEFORE you open Fusion.**

1

Open your school Outlook

- Go to outlook.office.com and sign in with your **school email** and school password.
- Look for Autodesk emails in **Focused**, **Other**, and **Junk**.

2

Join the hub — this makes your account

- Open the Autodesk email that says you were **invited to join a hub**. Click **Join Hub**.
- No account yet? It walks you through one: **real first and last name**, a password. Your school email is already filled in.
- Already made one with your school email? Click **Sign in** instead.
- If Autodesk sends a **verify** email, open it and click the button. You land on Mr. Gavaldon's hub in the browser.
- ONE account only.** "Your Autodesk Account is waiting" / "You've got access" emails: just sign in — never make a second account.

3

Open Fusion and sign in

- Installed? Open it and click **Sign In**. Not installed? Go to fusion.online.autodesk.com — the full Fusion in your browser.
- Same email and password as step 2. Welcome screens: **Next** / **OK**, keep the defaults.

4

Switch to our hub

- Click the **Data Panel** (grid button, top left) → click the hub name at the top → pick **Mr. Gavaldon's** hub.
- Don't see it? Go back to Outlook — you probably didn't click Join Hub.

5

Find your folder

- Open **your class** (your period) → **Students** → the folder with **your name**. Every file this year goes here.
- Class Files** is Mr. Gavaldon's — you can open files from it but you can't change them.

If Fusion asks you to "Create a Team," STOP and raise your hand. Don't type a team name — it means step 2 didn't finish.

Your folder is private. Classmates can't see it; you can't see theirs. Mr. Gavaldon can open it and see every step on your timeline — a file with two steps in it was copied, not built.

Never use Share → Public link. Sending someone your file is the same as handing them your test.

Plan B — only if Mr. Gavaldon tells you. No class folder yet: Data Panel → **New Project** → name it **Period# – Lastname Firstname** → open it → **Members and Permissions** → add robertgavaldon@burnhamwood.org. That shares it with him only.

☐ Signed in ☐ In Mr. Gavaldon's hub ☐ My folder is open ☐ Marked as done in Classroom Teacher initials: _____

My Autodesk email (**never** the password): _____
