

Fusion 360 setup — five steps, in order

By the bell: you are signed in, you are in the class hub, and your own folder is open.

1

Get into your school Outlook

- Go to outlook.office.com and sign in with your **school email** and school password.
- Can't get in? Raise your hand now — every other step goes through this inbox.

2

Create your Autodesk account

- Open the email from **Autodesk** — check **Junk** if it is not in your inbox.
- It says **"Your Autodesk Account is waiting."** Click **Create My Account Now**.
- Type your **real first and last name** and a password. Your email is already filled in.
- Open the verify email Autodesk sends and click the link.
- **Already made an Autodesk account with your school email?** Don't make a second one — just sign in.

3

Open Fusion and sign in

- Fusion on your computer? Open it and click **Sign In**.
- Not installed? Use it in your browser: fusion.online.autodesk.com — it's the full Fusion.
- Sign in with the Autodesk email and password from step 2.

4

Join our class hub

- Back in Outlook, open the email inviting you to a **hub**. Click **Join Hub**.
- In Fusion, open the **Data Panel** (grid button, top left).
- Click the hub name at the top of the Data Panel and switch to **Mr. Gavaldon's** hub.

5

Find your folder

- Open **your class** (your period). You'll see **Class Files** and **Students**.
- Open **Students** → the folder with **your name**. That is yours. Every file this year goes here.
- **Class Files** is Mr. Gavaldon's — you can open files from it but you can't change them.

If Fusion asks you to "create a team," stop and raise your hand. Don't make up a team name — I'll walk you through it.

Your folder is private. Classmates can't see it and you can't see theirs. I can open it and see every step on your timeline — a file with two steps in it was copied, not built.

Never use Share → Public link. Sending someone your file is the same as handing them your test.

Plan B — only if I tell you to. If you have no class folder yet: Data Panel → **New Project** → name it **Period# – Lastname Firstname** → open it → **Members and Permissions** → add robertgavaldon@burnhamwood.org. That shares it with me only.

☐ Signed in ☐ In Mr. Gavaldon's hub ☐ My folder is open Teacher initials: _____

Write your Autodesk email here (**never** your password): _____
