

Weekly Lesson Plan – Week 4 • Semester 1 • 2026–27 • Da Vinci School

Teacher: Gavaldon Week of: Aug 31, 2026 Course: Principles of Applied Engineering				
TEKS / ELPS:				
TEKS: §127.391(d)(1)(B) inputs, processes, and outputs; (d)(2)(A) communicate findings clearly; §127.391(d)(1)(B) inputs, processes, and outputs of technological systems; §127.391(d)(5)(C) use problem-solving techniques to develop technological solutions such as a product, process, or system ELPS: c.1C, c.2C, c.4C, c.4F, c.5B, c.5G				
Aim of the Lesson / Objective: <i>Statement of what you want students to do (skill) and/or know (knowledge). Students will...</i>				
MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
Students will summarize the variables and data types they have learned and prepare for the module quiz.	Students will demonstrate mastery of variables and data types on a graded quiz and begin working with strings.	Students will combine variables and strings in a guided build and summarize what they learned across the module.	Students will close every incomplete item in Module 1 and verify their progress against the course map.	Students will assemble the programs they wrote into a portfolio entry and preview the Fusion 360 block.
Employed Language Domain(s) Objective: <i>How students achieve the objective – Listening, Speaking, Reading, Writing. Students will...</i>				
Students will collaborate in teams to investigate engineering problems, communicate their findings, and present their solutions. They will listen to team members' ideas, discuss potential solutions, read relevant technical materials, and write explanations of their designs and findings.				
Assessment of Content Objective: <i>Instrument used to determine mastery. Ex: Exit Ticket.</i>				
Students will be assessed by written, group, or oral responses throughout the class period.				
Set (Bell Work): <i>A motivating action that engages students in the objective – question, fact, activity. Essential Question:</i>				
MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
Name three kinds of values a variable can hold, and give an example of each.	Read this code and say exactly what it prints.	What is a string, and how do you join two of them together?	Name three kinds of values a variable can hold, and give an example of each.	What is a string, and how do you join two of them together?
Methodology / Steps: <i>What it takes to teach the objective so 100% can pass the assessment. Teacher will... Teams will... Individuals will...</i>				
MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
Step 1: Bell ringer / essential question. Step 2: Bell-work: three kinds of values with examples (6 min) Step 3: Working with Data Types (Theory) (16 min) Step 4: Variables and Data Types Review + study notes (18 min) Step 5: Exit ticket: what you are still shaky on (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell-work: read the code and say what it prints (5 min) Step 3: Variables and Data Types Quiz (graded) (15 min) Step 4: Working with Strings in JavaScript (Theory) (20 min) Step 5: Exit ticket: post your score + one miss (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell-work: what a string is and how to join two (5 min) Step 3: Build a Teacher Chatbot (Workshop) (28 min) Step 4: Module 1 checkpoint: what you can now do (7 min) Step 5: Exit ticket (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell-work: the one item you have not finished (5 min) Step 3: How to read your progress page (6 min) Step 4: Catch-up: finish every open item in Module 1 (29 min) Step 5: Exit ticket: screenshot your progress (5 min)	Step 1: Bell ringer / essential question. Step 2: Bell-work: the program you are most proud of and why (5 min) Step 3: Portfolio: paste all four programs with a caption each (22 min) Step 4: What Fusion 360 is and what we build with it (8 min) Step 5: Exit ticket + Fusion starts Monday (5 min)
Resources: <i>Textbook, handouts, visuals, laptops.</i>				
Google Classroom, projector, engineering notebook, Design Brief packet / worksheets, laptops or phones for AI tools.				
Re-Teaching Activities: <i>What you prepare if students do not master the objective.</i>				
Review during bellwork; small-group re-teach; peer support.				
Reflection: <i>Students analyze what they accomplished and how they reached mastery.</i>				
Exit ticket – students state what they accomplished and what worked best.				
Study Skills: <i>Skills implemented by students – note-taking, summarizing, teamwork, etc.</i>				
Note-taking, summarizing, outlining, reading comprehension, teamwork, oral communication, problem-solving.				
SPED & 504 Accommodations / Modifications: <i>Codes.</i>				
Per Individualized Education Plan (IEP) / 504 plan.				
ELL Accommodations: <i>Codes.</i>				
Clarify directions (CD); Extra time (ET); Peer and Native Language Support (PN); Pre-teach vocabulary (PV); Rephrase, Repeat, Slow Down (RS); Visual Cues (VC); Wait time (WT); Pictorial Representation (DP).
