

You Make the Call

Name _____ Period _____ Date _____

The situation

One week before your product ships, your team finds a flaw. Fixing it means missing the launch date. Your manager wants it shipped on time.

1 Name the flaw you are dealing with

Use your own project, or invent a realistic one (a part that cracks, a battery that overheats, a strap that tears).

2 Circle your call

A — SHIP IT	B — DELAY IT	C — SHIP AND WARN
Say nothing. Hit the date.	Miss the launch. Fix the flaw.	Launch, disclose the flaw, fix later.

3 Three reasons — tied to the flaw, not to your feelings

1.	
2.	
3.	

4 What your choice costs you

Every option costs something. Name it.

5 Word for word, what you tell the customer
